

Claris FileMaker Server 19.4.2 Release Notes

December 2021

Software description

This software updates Claris® FileMaker Server® 16 through 19.4.1 to version 19.4.2 and addresses issues. See also:

- [FileMaker Server 19.0 Release Notes](#)
- [FileMaker Server 19.1.2 Release Notes](#)
- [FileMaker Server 19.2.1 Release Notes](#)
- [FileMaker Server 19.3.1 Release Notes](#)
- [FileMaker Server 19.3.2 Release Notes](#)
- [FileMaker Server 19.4.1 Release Notes](#)

FileMaker Server 19.4.2 is available as a full installer, which can also upgrade or update an existing installation. **Download the installer from your Electronic Software Download (ESD) page.** Or contact our Sales team at: sales@winsoft-international.com

Addressed issues

Installation

- Upgrading FileMaker Server to 19.4.1 using the Amazon Web Services (AWS) System Manager for a silent install on an AWS instance caused these issues: The credentials for accessing Admin Console didn't work, `serverCustom.pem` was deleted, and `dbconfig.xml` was reset to default.

Security

- When an ECC P-384 SSL certificate was used for FileMaker Server, Claris FileMaker Pro® and Claris FileMaker Go® were unable to securely connect to custom apps using fully qualified domain names.

Features

- Claris FileMaker WebDirect®: Merge fields briefly displayed internal string IDs before rendering the correct content.
- When calling the Perform Script on Server script step, the script session could not be disconnected in Admin Console if the running script changed the session identifier with the Set Session Identifier script step.

APIs, technologies, or features to be deprecated

As FileMaker Server evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion

of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the [Knowledge Base](#).
