

Claris FileMaker Pro 19.6.3 Release Notes

February 2023

This software updates FileMaker Pro 19 to version 19.6.3 and addresses issues. If you are unable to successfully update to FileMaker Pro 19.6.3, search the Knowledge Base for installation information.

New features and enhancements

Performance

- Databases hosted by FileMaker Server took longer than expected to open for the first time when they contained a large number of accounts and the network connection experienced delays.

General

- Under certain conditions, index values were missing after the index was built during a transaction.

Platform	Product	Updates Version	Download	Languages

macOS	FileMaker Pro 19	19.0.0 19.6.1	FileMaker Pro 19.6.3 Updater 	

APIs, technologies, or features to be deprecated

As FileMaker Pro evolves, the list of supported technologies, APIs, and features will change. As part of this evolution, certain operating systems versions, hardware, and features may be deprecated in favor of newer ones. Although deprecation does not mean the immediate deletion of an item, you should migrate your solution away from deprecated technologies, because these technologies may be removed in a future version of the product.

For the latest information about deprecated APIs, technologies, and features, search the Knowledge Base.
